Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1866 Excerpt: .by great chemical activity. It is not possible to assign to Chemistry any definite birth-year, but so many remarkable discoveries were made in 17 74 that we may, with good reason, date the foundation of modern chemical science from that period. It would be quite foreign to the object we have in view to give here any detailed account of the state of the science at the period referred to. We may mention, however, a few of the most important discoveries which made the year 1774 noted in the annals of Chemistry. The eminent Swedish chemist, Scheele, first isolated chlorine, calling it, in accordance with the accepted theories of the day, dephlogisticated muriatic acid. He also recognized baryta as a peculiar earth, and it henceforth took a place among the elementary substances. Scheele also published iu this same year his masterly essay on Manganese. Lavoisier was engaged in an investigation of the cause of the increase in weight of tin when calcined in close vessels--a research which led him to subsequent discoveries of immense importance. Wiegleb proved alkalies to be true natural constituents of plants. Cadet described an improved method of preparing sulphuric ether. Bergman showed the presence of carbonic acid in lead white. On the 27th of September in this year Comus reduced the calces of the six metals by means of the electric spark, before an astonished and delighted audience of savants. On the first of August, 1774, Priestley discovered oxygen, the immediate results..
