RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 154 pages. Original publisher: Washington, D. C. : United States Environmental Protection Agency, Office of Water, 2003 OCLC Number: (OCoLC)61709571 Subject: Drinking water -- Purification -- Government policy -- United States. Excerpt: . . . Figure 2. 3 Impact of Bromide Concentration on TTHM Speciation Variation in TTHM Speciation with Increasing Influent Bromide Concentration 100 TTHM 80 CHCl<sub>3</sub> of60 BDCM Percent DBCM 40 CHBr<sub>3</sub> 20 0 0. 035 0. 077 0. 09 0. 17 0. 22 Influent Bromide ( mg L ) Source: C. Hill ( 2002 ). To be published. 2. 2. 4 Change in NOM Characteristics The characteristics of NOM in a system can have significant impacts on the formation of DBPs. NOM can be derived from many sources in a watershed, such as decomposition of vegetation and dead organisms. Water and wastewater treatment plant discharges, agricultural and urban area runoff, and septic system leachate discharge are other potential sources of NOM. NOM is typically classified as either hydrophilic ( more soluble ) or hydrophobic ( less soluble and containing a greater aromatic fraction ). Hydrophilic NOM is more difficult to remove than hydrophobic NOM, but..

### Reviews

*Very useful for all group of people. It is amongst the most incredible pdf i actually have read through. Its been written in an extremely straightforward way and it is just right after i finished reading through this pdf by which basically modified me, change the way i think.*

-- **Felicia Nikolaus**

*These sorts of ebook is the ideal book offered. It can be written in simple terms rather than confusing. I discovered this pdf from my dad and i advised this publication to understand.*

-- **Mr. Alejandrin Murphy PhD**
