

Annual Report of the Trustees of the State Library Volume 65

Filesize: 5.91 MB

Reviews

This ebook is worth acquiring. Better than never, though i am quite late in start reading this one. You will not truly feel monotony at at any time of your own time (that's what catalogues are for about if you ask me).

(Lorenz Vandervort)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 28 pages. Original publisher: Hanover, N. H. : U. S. Army Corps of Engineers, Cold Regions Research and Engineering Laboratory ; Springfield, Va. : Available from NTIS, 1995 OCLC Number: (OCoLC)33322855 Subject: Soils -- Ammonium content. Excerpt: . . . extraction materials with a 70-year-old, qualita-Table 3. Cross-reactivities of tive colorimetric assay. The chemical confirmation commercial TNT immunoassays. reagents used were also derived from work done Millipore D-TECH by chemists around the turn of the century (re-viewed in Jenkins 1990). The resulting methods Tetryl - are both sensitive and relatively free from inter-2Am-DNT - ferences produced by humic substances or other 4Am-DNT - TNB nitroaromatics that are likely to occur at military 2, 6-DNT - sites. A single extract can be used to screen for 2, 4-DNT - picric acid, ammonium picrate, TNT, 2, 4DNT and RDX in soils. The estimated cost of a few dollars per sample is very low. Single assays can be run in about 20 minutes. Multiple samples can be pro-IMMUNOASSAYS FOR cessed in less time using cartridge or membrane PICRATE IN SOIL AND WATER manifolds. Immunoassays are gaining increased accep-Immunoassays are available commercially for tance in screening applications, although the costs detecting TNT in soil extracts and water. A disad-and time requirements can be significantly higher vantage of all immunoassays is that they also de-than spectrophotometric methods. The positive tect compounds that are structurally related to the response to picric acid of two TNT immunoassays target analyte. This phenomenon is called cross-presents two interesting possibilities. When a field reactivity. Antibodies are produced in response to site is known to contain no nitroaromatics other small molecules (molecular weight less than 200) than picric acid or ammonium picrate, immunoas-only after they...
