Mundart Press. Paperback. Book Condition: New. Paperback. 128 pages. Dimensions: 8.9in. x 5.9in. x 0.4in. This is a translation of a comparative grammar of five Algonquian Native American languages first published in Dutch in 1910. Although too short to represent a comprehensive grammar of these languages, it treats most parts of speech and is a good solid introduction to many of the major important morphological features of this family and the languages treated. It has been expanded, corrected and improved in the form of translators notes based on much more recent and complete material. It also includes many bibliographical resources for most of the Algonquian language family, which are geared towards comparative language learning methods. The two most widely spoken languages of this group, Ojibway (frequently spelled Chippewa, Ojibwa or Ojibwe) and Cree, are both examples of the close knit Central Algonquian group, while Micmac (also spelled Mikmaq and Migmaw) and the extinct Natick belong to the Eastern group. The western Blackfoot is usually placed with the Plains Algonquian group, but it is the most divergent member of the entire family and has roughly as many speakers as Micmac. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
